

SecureSave Start Up Guide

1. Insert the SecureSave DVD disc into your PC's DVD writer.
2. The SecureSave "Welcome" screen will appear automatically.
 - A. If the AutoPlay window appears first (Windows Vista users),
 1. check "Always do this software and games"; then
 2. click "Verbatim SecureSave" under "Install or run program".
3. Choose your appropriate language.
4. The software license agreement will appear. Please read carefully and press the "Accept" button. If you disagree ("refuse"), the software will close automatically.
5. Click "Next" to begin. The password screen will appear.
6. Enter your password. It need have minimum 8 digits. Then click "Next".
7. Add the files / folders into the window that you wish to save. You have the option to leave the disc open so that more data can be added later. Note that an open disc cannot be viewed in a DVD player or ROM drive. We recommend to tick the option and close the disc.
8. Once you have selected all files / folders, click "Record". When recording is complete, the disc will automatically eject from the drive. Click "Finish" and you are done!
